Spec Sheet

Nylon Flexible Mist Tube

Primarily used to route high pressure water from pump to stainless steel mist line. This flexible tube can be directly clamped down or fished through conduit, both in the building, in the ground or under concrete.

Made of virgin nylon this VU protected tube will withstand the most demanding sunlight conditions. With a working pressure of 1000 PSI makes it the first choice of the professional or do it yourselfer.

This tube can be fitted with simple Push Loc fittings or Compression Fittings without using internal reinforcements. Available in cut lengths, or 100, 500 or 1000 FT rolls.
